REPORT OF ANALYSIS

One packet labeled "RU58841 lot RU1004" was received on 17 September 2020. One portion of the powder in the packet was analyzed for identity using Fourier-transform infrared spectroscopy (FT-IR). The powder was confirmed as RU58841. An extra peak in the spectrum was observed at 1134 cm^{-1} . This might originate from a small amount of a glycol solvent residue and would not be reflected in the purity measurement below.

A second portion of the powder in the packet was analyzed for purity using high pressure liquid chromatography (HPLC). Based on ultraviolet detection at 262 nm the sample was found to be 99.5% pure.

The spectrum and chromatogram are enclosed for your reference.
